Introduction

The Terms of Reference issued to the Beaufort Sea Environmental Assessment Panel included the instruction that "all documents submitted to and correspondence with the Panel are available to the public." In response to that instruction the Panel established a Public File of Beaufort Sea Environmental Assessment Panel material. This file was maintained throughout the review process at the Beaufort Sea Panel Office, Inuvik and at the Federal Environmental Assessment Review Offices in Vancouver and Ottawa. An annotated "Index to the Public File" was established and maintained with the Public File. Copies of this Index were located at the Department of the Executive, Government of the Northwest Territories, Yellowknife, N.W.T.; the Yukon Archives, Whitehorse, Yukon; at the DIAND office, Frobisher Bay, N.W.T.; and later at the Arctic Institute of North America, Calgary, Alberta. The Public File Index was available for use at all public meetings of the Panel. In July 1983, prior to the public sessions, a listing of all reports and publications included as part of the Panel Public File was distributed. All documents were made available on a limited loan basis throughout the process.

This bibliography includes reports, publications and interventions held in the Beaufort Sea Environmental Assessment Panel Public File and reflects the organization of that document. Although correspondence to the Panel or the Secretariat is included as part of the Public File, this correspondence is not included in the bibliography unless it was received as an intervention to the Panel.

Section 1 covers reports produced by or for the Panel and are entered by date of release. Technical specialist reports, although produced under contract to the Beaufort Sea Environmental Assessment Panel, are treated in the same manner as other interventions and not as Panel produced material.

Formal submissions by the Proponents in response to the "Guidelines for the preparation of an environmental impact statement: Beaufort Sea hydrocarbon production proposal" and to the "Statement of deficiencies on the environmental impact statement for hydrocarbon development in the Beaufort Sea - Mackenzie Delta" are covered in Section 2. This documentation includes the Beaufort Sea - Mackenzie Delta environmental impact statement (EIS), the Beaufort Sea - Mackenzie Delta environmental impact statement - supplementary information, and the Beaufort Sea EIS support document series. Following the submission of the environmental impact statement, the Proponents released a series of in-house and consultant reports which had been referenced in the EIS. Although not formally submitted, these reports are included in Section 2 as the Beaufort Sea EIS reference works series.

Published reports and documents were provided to the Panel by intervenors, proponents and the Secretariat throughout the review process both for specific information and as background data. These documents form Section 3 of the bibliography.

Section 4 of the bibliography includes all formal submissions or interventions prepared for the review of the Beaufort Sea hydrocarbon production proposal. These documents relate to the guideline review, to the review of the environmental impact statement or the supplementary information to the environmental impact statement, or to the final review phase - the public meetings. In some cases the submissions included previously published reports which may also be found in Section 3.

Section 5 contains the same submissions as Section 4 but in this section the submissions are listed in order of receipt at the General and Community Sessions.

Interventions and Formal Submissions to the Beaufort Sea Environmental Assessment Panel Listed by Author

Sections 4 and 5 of this bibliography describe written submissions or interventions received by the Panel. Most of these submissions are documents prepared specifically for some aspect of the review of Beaufort Sea hydrocarbon production and transportation.

Before the Public Session in the autumn of 1983 submissions were received which commented on the draft guidelines, on the Beaufort Sea - Mackenzie Delta environmental impact statement or on the Beaufort Sea - Mackenzie Delta environmental impact statement - supplementary information. Many documents prepared under contract to the Beaufort Sea Environmental Assessment Panel by their technical specialist team are included in this section. These submission are listed in Section 4.1.

The Beaufort Sea Environmental Assessment Panel held a final public review between September 1983 and December 1983. General Sessions were held in Resolute (RB), Inuvik (IN), Whitehorse (WH), Yellowknife (YK), Calgary (CA) and Ottawa (OT). These sessions considered technical matters and written submissions were made a week in advance of the intervention at the meeting. These written submissions are included in section 4.2. Also included in this section are written submissions submitted in response to Panel concerns either immediately prior to the Public Sessions or after the conclusion of the sessions. These documents are referred to as GEN documents.

Community Sessions (CS) were held in 20 communities to provide community members an opportunity to present their views to the Panel. Submissions received at the Community Sessions are listed in Section 4.3

Submissions relating to the guideline review or the review of the environmental impact statement and the supplementary information are available as compendiums. The 'final review phase submissions' are not compiled in any single document (although an annotated index to the submissions is available). Documents are available for review at the Federal Environmental Assessment Review Offices in Ottawa and Vancouver.
